

## SiriusXM Music for Business Internet Radio

### Internet Radio for your Business

The GDI-SXBR1 is designed to access your SiriusXM Internet Music for business account directly from the internet to play your selected channel over your business's audio and/or telephone systems.

### Product Features

- Commercial grade microprocessor for optimized audio & data streaming
- Simultaneously play music throughout your business's audio & telephone system (Note: The GDI-SXBR1 can play one channel at a time)
- Connect to an Ethernet (RJ45) or wireless network in minutes
- Built-in Wireless 802.11n Wi-Fi connects directly to any 802.11b/g/n wireless router
- WEP & WPA 1 / 2 compliant
- Auto Play - following a power outage the GDI-SXBR1 re-connects to your network and starts playing as soon as power is restored
- Stereo & Mono RCA audio outputs with 8/600 Ohm switch
- 4-line display for easy set up & music selection
- 5 Presets for immediate access to favorite music selections
- Built-in Monitoring Speaker
- Industrial Strength Housing - high quality metal enclosure designed for demanding business environments
- Adjustable External Wi-Fi Antenna
- Ethernet LAN Jack
- Integrated Grace Digital website allows searching and management of SiriusXM channels
  - > Name, select and manage radios by group
  - > Set schedules to automatically adjust radio channels, volume and power
